GVISION Announces CORE POS Product Strategy **Full Line of POS Displays Represent Best Value for VARs**

Lake Forest, CA (January 31, 2006) – GVISION USA, Inc., a leading manufacturer of specialty LCD displays has announced their complete line of Core POS Products with immediate availability for VARs and resellers nationwide. The Core POS products include LCD sizes from 10.1" to 19" and are available in touch and non-touch models.

GVISION foresees that this Core Group of POS Products will address over 90% of POS display market needs. While our many models and SKUs remain available to our national customer base, company research indicates that these 12 model types have generated the most revenue and gross profit for our clients. When focusing on this Core Group of six (6) LCD screens, available in both touch and non-touch versions, our VAR partners have had tremendous success selling into the POS environment.

"Our main goal was to simplify our POS product offering and bring real value to our dealer base," offered Bruce Mesnard, manager of channels & business development for GVISION USA. "With these 12 models, VARs can offer great products, at great prices for every POS application and environment." Several models are especially suited for increasing market share in the SMB marketplace.

The Core includes 10.4", 12.1" 15" Value, 15" Premium, 17" and 19" LCD displays. The standard displays are bright, high-resolution screens and built for the heavy-duty rigors encountered in POS environments. The touch versions feature the "GTouch", 5 wire resistive plug 'n play touchscreen, with either serial interface or our dual serial/USB controller for easy adaptability in any restaurant, bar or hospitality situation.

The entire GVISION Core POS product line can be purchased through authorized distribution partners, nationwide. For more information on GVISION and its products, call 866-651-9688 or visit the GVISION website at www.GVISION-USA.com.
