Enhanced Website provides GVISION with Fresh New Look

Site Design Enables Clients & Partners to Search More than 100 models of LCD Displays

Lake Forest, CA (September 2, 2005) – Demonstrating its technology leadership in vertical market LCD displays, GVISION USA, INC., today announced it has released a new and fresh-looking corporate website on the Internet. GVISION's new layout, navigation and site map provides quick accessibility to their many models of desktop, touch screen and open frame LCD displays through the product or solution menus. Viewing is available at <http://www.GVISION-USA.com>.

The new look of GVISION's website was designed to allow visitors to navigate swiftly through the information on the site. According to research conducted by World Wide Web Consortium, average users on the web like to have faster access and obtain information quicker so that they get what they need and want in a short amount of time without spending a lot of time or resources. GVISION has addressed that need with a great new site.

"GVISION's enhanced navigation and setup will allow our prospective clients to quickly find the appropriate LCD display for their particular application," said Keddy Chen, GVISION General Manager. "The next development stage will improve the Partner area, so our resellers will be better able to support their clients with GVISION LCD products." Stage two is expected by mid-October.

GVISION products are available through authorized distribution partners, nationwide. For more information on GVISION and its products, call 1-866-651-9688 or visit the GVISION website at www.GVISION-USA.com.
