

GVISION Announces the F Series LCD Monitor/TV Multi-feature monitor offering advanced multimedia capabilities

Lake Forest, CA, July 29, 2003 – GVISION USA, Incorporated introduces the F Series LCD Monitor/TV with integrated TV tuner, video input, and other feature options. With the F Series you can view data, TV, video, and digital pictures with the convenience and flexibility of a single display.

The three series offerings are F5AX at 15”, F7AH at 17”, and F9AH at 19”. Each display has a slim enclosure and elegant base which folds, mounts or stands virtually anywhere. A standard wall mount and VESA mount on the back of the unit allow for versatility and endless viewing applications. The polar silver enclosure is accented with refined OSD controls.

All models offer both an analog interface and a Digital Video Interface (DVI) standard. The inclusion of DVI is an important feature that ensures future compatibility with display interface technology and provides exceptional image quality. An external head phone jack and built in speakers are standard also.

The premium configuration option is “-TG”, which offers a TV tuner, video inputs, USB hub, and 4-in-1 memory card reader. The “-TF” configuration has the basic TV tuner and video in functions. The TV tuner allows for input of TV signals and video, which are easily controlled by the wireless remote. The 4-in-1 memory card reader is Compact Flash, Secure Data, Multi Media Card, and Smart Media compatible for digital image viewing or instant slide show using the jpeg player. The USB hub has one upstream port and two downstream ports to increase plug and play options.

“This series represents GVISION’s efforts toward product convergence of TV, video, and digital technologies with the LCD monitor,” said Keddy Chen, General Manager GVISION USA Incorporated. He continued, “We expect to see more functions combined into monitors as display demands outgrow simple data and single input formats.”

GVISION USA supplies several large OEMs, VARs, SIs a wide range of LCD products targeting retail POS, hospitality, gaming, financial, industrial, and medical applications. The manufacturer has sold over 600,000 display units worldwide. This success is due largely in part to the solid quality, value, and flexibility of GVISION’s products.

Founded in 1999 as a spin-off from a billion-dollar international high-tech company, GVISION USA, Inc. designs and manufacturers a full range of over 100 types of LCD displays products for multiple markets. Today GVISION’s largest shareholder is Taiwan Styrene Monomer Corporation, a \$1 billion manufacturer of styrene monomer, p-diethyl benzene and other chemical products. GVISION is committed to offering functionality and versatility with LCD display options ranging from complete touch screens monitors to open frame units. Company headquarters are based in Taiwan, with US operations in Lake Forest, CA. For more information on GVISION’s products please call 949-586-3338 or visit our website at www.gvision-usa.com.
