## **New 15” LCD Display with MSR**

**GVISION Exhibits at Retail Systems 2004, Booth #600**

**FOR IMMEDIATE RELEASE**

Lake Forest, CA – May 18, 2004 – GVISION USA, Inc. will premier the new J5NX 15” LCD with MSR reader at Retail Systems 2004 in Chicago, IL. This new display targets card-based transactions as seen in retail sales or foodservice. The new design, incorporating an LCD display and MSR reader, is a cost effective alternative to separate peripherals.

The J5NX offers a mix of features suitable for numerous applications. Options include analog and DVI signal connectors, touch screen, video input and built in speakers. The dual signal input of analog and DVI allows for input signal flexibility. Either a resistive or capacitive touch screen is available. Video inputs of S-Video and component video are optional as well. The bezel is offered in beige or black and is IP 54 compliant. Tempered protective glass is a choice with video only units. GVISION also offers a selection of mounting options and stands for this series. Also featured at Retail Systems 2004 will be a range of LCDs and touch screens from 6.4” to 22”.

“We are pleased to announce our latest LCD display targeting retail,” said Mr. Keddy Chen, General Manager of GVISION USA. Mr. Chen further commented, “GVISION has worked with several VARs and solution providers to create a unit that meets their technical requirements while providing a cost effective unit for the retail client.”

GVISION USA supplies several large OEMs, VARs, SIs a wide range of LCD products targeting retail POS, hospitality, gaming, financial, industrial, and medical applications. The manufacturer has sold close to 1 million display units worldwide. This success is due largely in part to the solid quality, value, and flexibility of GVISION’s products.

Founded in 1999 as a spin-off from a billion-dollar international high-tech company, GVISION USA, Inc. designs and manufacturers a full range of over 100 types of LCD displays products for multiple markets. Today GVISION’s largest shareholder is Taiwan Styrene Monomer Corporation, a \$1 billion manufacturer of styrene monomer, p-diethyl benzene and other chemical products. GVISION is committed to offering functionality and versatility with LCD display options ranging from complete touch screens monitors to open frame units. Company headquarters are based in Taiwan, with US operations in Lake Forest, CA.
